

FOR IMMEDIATE RELEASE

PDF Compressor Announces Limited Time Software Giveaway

From January 15 to February 1 , 2017, PDF Compressor will be available at no cost

JANUARY 11, 2017 - The team at PDF Compressor is thrilled to announce a limited-time giveaway. Their exclusive software will be available for download from January 15 through February 1 , 2017, at no cost.

PDF Compressor works by converting scanned PDF files into smaller files. According to PDF Compressor, their software offers a 23% compression ratio that takes 30MB files and converts them into 8MB files without sacrificing content or quality.

Since scanned PDF files are derived from images with large file sizes, they can quickly consume storage space. In addition, sending e-mails with large PDF attachments can be difficult.

PDF Compressor eliminates both problems with one streamlined, easy to use, fast program. Users can also choose to save their files to the original folder without overwriting the original versions, and users can also opt to save PDF files to specified folder paths.

In addition, PDF Compressor automatically removes restrictions from protected files.

The software is now available for download at the PDF Compressor website, and it will be available for free until February 1 , 2017. Details are available at <http://www.pdfcompressor.net/giveaway.html>.

About PDF Compressor

PDF Compressor offers a fast and easy way to compress PDF files from 30MB to 8MB without sacrificing content quality.
